STRATEGIC PARTNER

STRATEGIC ORGANIZING PARTNER

SUPPORTING PARTNERS

As Indonesia advances toward a digitally driven economy, digital transformation has become a strategic national priority that goes far beyond technology adoption. It now shapes how the nation builds resilient digital infrastructure, modernizes industries, strengthens public services, and drives inclusive and sustainable growth. Connectivity, cloud and data infrastructure, artificial intelligence, cybersecurity, and digital talent collectively form the backbone of Indonesia's digital future.

Digital Transformation Indonesia Conference & Expo (DTI-CX) is designed as a strategic innovation stage, not merely a conference. It is a high-level platform where policymakers, regulators, industry leaders, technology innovators, and investors from Indonesia and across Asia converge to shape the future of digital infrastructure, the digital economy, and cross-sector transformation. DTI-CX serves as a critical meeting point between policy direction and real-world implementation, bridging national priorities with industry execution.

Across two days, DTI-CX provides a structured yet dynamic forum for leadership dialogue and collaboration. Day 1 focuses on national digital infrastructure and industry transformation, highlighting the role of telecommunications, cloud, and data infrastructure in supporting economic growth, industrial competitiveness, energy transition, and national digital sovereignty. Day 2 shifts the conversation toward the digital economy, artificial intelligence, digital talent, and inclusive transformation, addressing how technology adoption, data-driven innovation, and human capital readiness will shape Indonesia's digital trajectory toward 2030.

Positioned as a cross-industry innovation hub, DTI-CX goes beyond the exchange of ideas. It enables leaders to align strategies, build partnerships, and co-create future-ready digital ecosystems. By integrating policy dialogue, industry deep dives, technology showcases, and high-level networking, DTI-CX creates a space where Indonesia's digital vision intersects with Asia's innovation momentum, accelerating collaboration, investment, and impact across the region.

ROOM 1
CONFERENCE AGENDA
DAY 1 – NATIONAL DIGITAL INFRASTRUCTURE & STRATEGIC INDUSTRY
TRANSFORMATION
Wednesday, 05 August 2026

Session 1: Future networks & national connectivity
