“Continuing the Journey: Sustainable Growth through Digital Transformation”

The DTI-CX 2024 conference is meticulously designed to unravel the potential of Indonesia's ascent to global economic prominence by 2045 through the prism of digital transformation.

The trajectory of Indonesia towards emerging as a formidable global economic force by 2045 pivots on the adept mastery of digital technology. Numerous studies underscore the transformative impact of digitalization on the economic sector, projecting a remarkable leap in Indonesia's GDP to an estimated Rp 22,500 trillion—far surpassing growth projections without embracing digital transformation.

Indonesia's digitalization potential is underpinned by several key factors, including a burgeoning population, sustained economic growth, rising digital literacy rates, and government policies fostering the development of the digital economy.

Looking ahead to 2045, technological forecasts anticipate an unprecedented surge in connectivity and data usage. The advent of the 6G and 7G era, coupled with global internet traffic reaching 2,000 exabytes and home connect access hitting 1 Tbps, presents novel opportunities for Indonesia to bolster productivity and enhance economic competitiveness.

This immersive two-day conference, held across three parallel conference rooms and featuring around 36 sessions, will delve into various facets of digital transformation—from cutting-edge technologies and solutions to practical industry applications.

Technological innovations and solutions under discussion encompass Fiber & Tower, ISP & Telco Tech, Data Center Tech, Cyber Security, AI, Big Data & Machine Learning, Enterprise Solutions, and Data Management. Industries in focus span Mining, Oil & Gas, Banking FSI, Manufacturing, Education, Agriculture, Real Estate, Utility & Infrastructure, and Healthcare.

Uniting industry leaders, tech experts, and policymakers in dynamic discussions across four concurrent conference rooms, this comprehensive conference aims to explore the nexus between technology and sustainable growth. By examining advancements and applications across diverse sectors, participants will actively contribute to shaping Indonesia's digital future. Embark with us on this transformative journey, navigating towards a digitally sustainable and prosperous future fueled by innovation, collaboration, and a shared vision for a digitally powered, sustainable, and prosperous Indonesia.
